

Knock-down rate: 63 %

Lanes: **1.** HeLa cells transfected with Renilla Luciferase esiRNA (RLUC, Cat.No. EHURLUC) as negative control. **2.** HeLa cells transfected with GAPDH esiRNA (Cat.No. EHU146741).

Quantitative-Immunoblotting: Lysates were separated on SDS-Page and probed with mouse anti-GAPDH (1:20000) Clone: GAPDH-71.1 (Cat.No. G8795) and rabbit anti-tubulin (1:20000) (Abcam) antibodies. The signal intensities of indicated bands were quantified using an Odyssey infrared imaging system (Li-COR) and normalized to the tubulin signal. At 72h post transfection, a 63% GAPDH protein reduction was measured between the negative control RLUC and the sample treated with GAPDH esiRNA.
